DIARY NOTES

DD/S

13 September 1965

1. I received a call from Colonel White's office and another from the Director requesting a letter to the White House on nonreimbursable Agency employees assigned to other Government agencies. (Mr. Helms later advised that the letter should include information on both reimbursable and nonreimbursable employees.) The letter should include the name and salary of each detailee, the date and purpose of detail, and the arrangement under which the detail was made. (I asked Emmett Echols to prepare the necessary information by the end of the week.)

move could run a million dollars, I want to be sure that this move is necessary. I also want to establish a timing phase should we take this course of action. Accordingly, I called both George Meloon and [REDACTED] and asked them to get together and explore the need for this space, the timing, and the justification to back up these proposals. Earle informed me that NPIC had hoped to obtain additional space on the fifth floor which had been previously assigned [REDACTED] recently advised that they will need this space in addition to other space they had given us in order to meet their expanding requirements. This action would greatly limit NPIC's ability to accommodate their space requirements, particularly in view of my meeting with representatives of NPIC, DD/I, and the Office of Personnel last Friday, 10 September, at which we agreed with NPIC and DD/I that the NPIC recruiting program for the next twenty-one months would involve the EOD of 680 new employees. In effect, this will mean the processing of almost 2,800 applications to obtain the 680 persons, a ratio of about 4 to 1. We agreed to set up a special personnel unit in NPIC to accomplish this, and we agreed on the general details of the operation. NPIC will process a paper to me through DD/I for agreement, and I advised that this program should get under way immediately.

4. [REDACTED] of the Special Intelligence Staff of DD/S&T telephoned to ask for assistance in preparing and printing the gray telephone book since he does not have the capability to do this. Chuck mentioned this last year but we turned it down. Apparently records have not been kept and an inquiry must be conducted to find out the location of the telephone extensions and the people having access to those telephones. I said that I would explore the matter and inform him as to what can be done.
